Contents of Volume 267

Vol. 267 Nos. 1–2 **October 1, 2002**

Special Issue: Advances in Flood Research

Preface 1
Flood risk and flood management
E. J. Plate 2
Farms adaptation to changes in flood risk: a management approach
J.-M. Pivot, E. Josien and P. Martin 12
Accuracy of radar rainfall estimates for streamflow simulation
M. Borga 26
Advanced flood forecasting in Alpine watersheds by coupling meteorological observations and forecasts with a distributed hydrological model
K. Jasper, J. Gurtz and H. Lang 40
Climate change scenarios and runoff response in the Mulde catchment (Southern Elbe, Germany)
L. Menzel and G. Bürger 53
A first-order analysis of the climate change effect on flood frequencies in a subalpine watershed by means of a hydrological rainfall–runoff model
I. Muzik 65
A process based assessment of the potential to reduce flood runoff by land use change
F. Naef, S. Scherrer and M. Weiler 74
Land-use impacts on storm-runoff generation: scenarios of land-use change and simulation of hydrological response in a meso-scale catchment in SW-Germany
D. Niehoff, U. Fritsch and A. Bronstert 80
Statistical analysis of the flood situation and assessment of the impact of diking measures along the Elbe (Labe) river
M. Helms, B. Büchele, U. Merkel and J. Ihringer 94
Impact of river training and retention measures on flood peaks along the Rhine
R. Lammersen, H. Engel, W. van de Langemheen and H. Buiteveld 115

Vol. 267 Nos. 3–4 **October 15, 2002**

Special Issue: Non-Invasive Methods in Hydrology

Imaging and characterisation of subsurface solute transport using electrical resistivity tomography (ERT) and equivalent transport models
A. Kemna, J. Vanderborght, B. Kulessa and H. Vereecken 125
Vadose zone flow model parameterisation using cross-borehole radar and resistivity imaging
A. Binley, G. Cassiani, R. Middleton and P. Winship 147
Seasonal variation of moisture content in unsaturated sandstone inferred from borehole radar and resistivity profiles
A. Binley, P. Winship, L. J. West, M. Pokar and R. Middleton 160
Variations of self-potential and unsaturated water flow with time in sandy loam and clay loam soils
C. Doussan, L. Jouniaux and J.-L. Thony 173
CT derived porosity distribution and flow domains
M. Císlerová and J. Votrubová 186
Accuracy of soil water content measurements using ground penetrating radar: comparison of ground penetrating radar and lysimeter data
H. Stoffregen, U. Yaramanci, T. Zenker and G. Wessolek 201
Electrokinetic spontaneous polarization in porous media: petrophysics and numerical modelling
K. Titov, Yu. Ilyin, P. Konosavski and A. Levitski 207
Analyses of soil water content variations and GPR attribute distributions
B. Schmalz, B. Lennartz and D. Wachsmuth 217

PII: S0022-1694(02)00247-0

An integrated geophysical investigation of the hydrogeology of an anisotropic unconfined aquifer
S. K. Sandberg, L. D. Slater and R. Versteeg 227
Three-dimensional imaging of pore water diffusion and motion in porous media by nuclear magnetic resonance imaging
K.-H. Herrmann, A. Pohlmeier, D. Gembris and H. Vereecken 244
Direct current and self-potential monitoring of an evolving plume in partially saturated fractured rock
R. E. Nimmer and J. L. Osiensky 258
Monitoring snowmelt induced unsaturated flow and transport using electrical resistivity tomography
H. K. French, C. Hardbattle, A. Binley, P. Winship and L. Jakobsen 273
Using X-ray computed tomography in hydrology: systems, resolutions, and limitations
D. Wildenschild, J. W. Hopmans, C. M. P Vaz, M. L. Rivers, D. Rikard and B. S. B. Christensen 285
